

Enrichment Heatmap: Significant_Genes_HopN1_8h_vs_Filtered_D36E_EV

Heatmap visualization showing enrichment scores (color scale from 0 to 1) for 100 genes (rows) across 100 samples (columns). The genes are listed on the right, and the samples are listed on the bottom. The color scale indicates the magnitude of enrichment, with red representing higher values (up to 1) and white representing lower values (down to 0).
